1. All pending claims 1-11 and 13 are allowed. Claims 13 and 14 are newly added.  
Claims 1, 13 and 14 are independent.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 has been amended so that the light interference module interferes the light into the image sensor "by plural segments which reflect different functions" and thus triggers the image reading device to perform a predetermined procedure by "each said segment". The examiner agrees with Applicant on that this limitation in combination with other limitations of claim 1 makes the claimed invention distinct over the closest prior art of record Chen et al. (U.S. Patent No. 6,268,599), since all the image sensors in Chen et al. provide the switching function in correspondence to a different amount of radiance. Chen et al. uses the radiance of light to produce different signals of operation. Thus, Chen et al. does not teach using the segmentalized light to activate different functions. Please see REMARKS on page 4, the last paragraph to page 5, the third paragraph.

Claims 2-11 depend upon claim 1.

New claims 13 and 14 recite similar limitations to those of claim 1 with respect to "segmentalized light" and associated function or procedure, which is not taught by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
